#### 1. Scope

This specification defines general provisions as well as inspection standards for TFT module supplied by Kingtech Group Co.,Ltd.

If the event of unforeseen problem or unspecified items may occur, naturally shall negotiate and agree to solution.

#### 2. General Information

| TITEM                          | STANDARD VALUES                   | UNITS |
|--------------------------------|-----------------------------------|-------|
| LCD type                       | 3.5"TFT                           |       |
| Dot arrangement                | 480(RGB)×640                      | dots  |
| Color filter array             | RGB vertical stripe               |       |
| Display mode                   | Wide View+TF / Normally Black     | -     |
| Gray Scale Inversion Direction | 80/80/80/80 deg(U/D/L/R @ C/R>10) |       |
| Eyes Viewing Direction         | ALL                               |       |
| Driver IC                      | HX8363A                           |       |
| Module size                    | 63(W)×85(H)×2.9(T)                | mm    |
| Active area                    | 5357W)×71.42(H)                   | mm    |
| Dot pitch                      | 0.116(W)×0.116(H)                 | mm    |
| Interface                      | 3-wire SPI + RGB interface        |       |
| Operating temperature          | -20 ~ +70                         | °C    |
| Storage temperature            | -30 ~ +80                         | °C    |
| Back Light                     | 8 White LEDS                      |       |
| Weight                         | TBD                               | g     |

Note 1: Viewing direction for best image quality is different from TFT definition, there is a 180 degree shift.

Note 2: Requirements on Environmental Protection: RoHS

Note 3: LCM weight tolerance: +/- 5%

| Horizontal active area      | HDISP  |                     | -    | 480  | -    | DCK  |
| Pixel clock frequency       | DCK    | VRR = Min. 50Hz     | 20.3 | -    | 32.2 | MHz  |
| When RGB I/F is running     | DON    | - Max. 70Hz         | 31   | -    | 49.2 | ns   |

Note: (1) Signal rise and fall times are equal to or less than 20 ns.

- (2) Input signals are measured by 0.30 x VDD1 for low state and 0.70 x VDD1 for high state.
- (3) HP is multiples of eight DCK.
- (4) Data lines can be set to "High" or "Low" during blanking time Don't care.
- (5) VRR must keep from 50Hz to 70Hz when adjust other items.

## 8. Backlight Characteristic

| Item                        | Symbol           | MIN              | TYP  | MAX | Unit | Remark |
|-----------------------------|------------------|------------------|------|-----|------|--------|
| Forward Current             | $I_{\mathrm{F}}$ | 20. <del>7</del> | 20   |     | mA   |        |
| Forward Voltage             | VF               | 24               | 25.6 |     | V    |        |
| Backlight Power consumption | W <sub>BL</sub>  | 1-               | TBD  |     | W    |        |

Note 1: Each LED: IF =20 mA, VF =3.2V.

Note 2: Optical performance should be evaluated at Ta=25 ℃ only.

Note 3: If LED is driven by high current, high ambient temperature & humidity condition. The life time of LED will be reduced. Operating life means brightness goes down to 50% initial brightness. Typical operating life time is estimated data.

Note (3) Definition of Contrast Ratio (CR)

The contrast ratio can be calculated by the following expression Contrast Ratio (CR) = L63 / L0

 $\Phi = 270^{\circ}$ 

L63: Luminance of gray level 63, L0: Luminance of gray level 0 Note (4) Definition of response time

Note (5) Definition of Transmittance (Module is without signal input)

Transmittance = Center Luminance of LCD / Center Luminance of Back Light x 100%

Note (6) Definition of color chromaticity (CIE1931)

Color coordinates measured at the center point of LCD

### 11. Inspection Standard

#### 11.1. QUALITY:

THE QUALITY OF GOODS SUPPLIED TO PURCHASER SHALL COME UP TO THE FOLLOWING STANDARD.

#### 11.1.1. INSPECTIONTOOLS AND INSTRUMENTS

Vernier calipers, film scales, multimeter, magnifying eyepiece, ND5%, luminance meter and so on.

#### 11.1.2. THE METHOD OF PRESERVING GOODS

AFTER DELIVERY OF GOODS FROM KINGTECHO PURCHASER. PURCHASER SHALL CONTROL THE LCM AT -10 TO 40 ,AND IT MIGHT BE DESIRABLE TO KEEP AT THE NORMAL ROOM TEMPERATURE AND HUMIDITY UNTIL INCOMING INSPECTION OR THROWING INTO PROCESS LINE.

#### 11.1.3. INCOMING INSPECTION

(A) THE METHOD OF INSPECTION IF PURCHASER MAKE AN INCOMING INSPECTION, A SAMPLING PLAN SHALL BE APPLIED ON THE CONDITION THAT QUALITY OF ONE DELIVERY SHALL BE REGARDED AS ONE LOT.

(B) THE STANDARD OF QUALITY

ISO-2859-1 (SAME AS MIL-STD-105E) .LEVEL: II

|          | , ,    |
|----------|--------|
| CLASS    | AQL(%) |
| CRITICAL | 0.4 %  |
| MAJOR    | 0.65 % |
| MINOR    | 1.5 %  |

EVERY ITEM SHALL BE INSPECTED ACCORDING TO THE CLASS.

(C) MEASURE

IF AS THE RESULT OF ABOVE RECEIVING INSPECTION, A LOT OUT IS DISCOVERED. PURCHASER SHALL BE INFORM SELLER OF IT WITHIN SEVEN DAYS. BUT FIRST SHIPMENT WITHIN FOURTEEN DAYS.

#### 11.1.4. WARRANTY POLICY

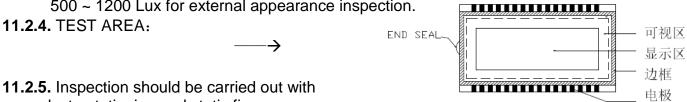

KINGTECHWILL PROVIDE ONE-YEAR WARRANTY FOR THE PRODUCTS ONLY IF UNDER SPECIFICATION OPERATING CONDITIONS. KINGTECHWILL REPLACE NEW PRODUCTS FOR THESE DEFECT PRODUCTS WHICH UNDER WARRANTY PERIOD AND BELONG TO THE RESPONSIBILITY OF KINGTECH.

#### 11.2. CHECKING CONDITION

- 11.2.1. CHECKING DIRECTION SHALL BE IN THE 45 DEGREE AREA TO FACE THE SAMPLE.
- 11.2.2. CHECKER SHALL SEE OVER 300±25 mm. WITH BARE EYES FAR FROM SAMPLE
- **11.2.3.** Ambient Illumination:

0 ~30 Lux for functional inspection 500 ~ 1200 Lux for external appearance inspection.

**11.2.4.** TEST AREA:

rope electrostatic ring and static finger cover (both hands except small fingers must be worn)

**11.2.6.** The inspector may make a visual inspection or a comparative examination with a film ruler and a magnifying eyepiece. Individual defects shall be determined according to the limited

#### samples.

- **11.2.7.** Functional testing uses electrical testing fixtures or test fixtures required by customers.
- **11.2.8.** the ion fan should be used when testing.

#### 11.2.9. the principle of judgment

11.3.1 If the defect outside the visual area does not affect the assembly and display, it will be judged as a good product.

#### 11.3.2 Poor definition

#### Pixel:

A combination of three sub-pixels (Red + Green + Blue).

#### Dot:

Any of the sub-pixels (Red or Green or Blue).

### **Bright and dark dots:**

A point pixel (sub-pixel: R, G, B pixels) is lit or turned off during the display function test. **Highlights**:

Usually considered to be shown on a black screen.

#### Dark spots:

They are generally considered to be shown on R, G, B solid colors or white images.

### Neighborhood:

Two or three adjacent point pixels (dot: sub-pixel) connected together (R, G or G, B or B, R or RGB).

#### 12. Handling Precautions

#### 12.1 Mounting method

The LCD panel of KINGTECHTFT module consists of two thin glass plates with polarizes which easily be damaged. And since the module in so constructed as to be fixed by utilizing fitting holes in the printed circuit board.

Extreme care should be needed when handling the LCD modules.

#### 12.2 Caution of LCD handling and cleaning

When cleaning the display surface, Use soft cloth with solvent

[Recommended below] and wipe lightly

- Isopropyl alcohol
- Ethyl alcohol

Do not wipe the display surface with dry or hard materials that will damage the polarizer surface.

Do not use the following solvent:

- Water
- Aromatics

Do not wipe ITO pad area with the dry or hard materials that will damage the ITO patterns Do not use the following solvent on the pad or prevent it from being contaminated:

- Soldering flux
- Chlorine (Cl) , Sulfur (S)

If goods were sent without being silicon coated on the pad, ITO patterns could be damaged due to the corrosion as time goes on.

If ITO corrosion happen by miss-handling or using some materials such as Chlorine (CI), Sulfur (S) from customer, Responsibility is on customer.

#### 12.3 Caution against static charge

The LCD module use C-MOS LSI drivers, so we recommended that you:

Connect any unused input terminal to POWER or GROUND, do not input any signals before power is turned on, and ground your body, work/assembly areas, and assembly equipment to protect against static electricity.

#### 12.4 packing

- Module employs LCD elements and must be treated as such.
- Avoid intense shock and falls from a height.
- To prevent modules from degradation, do not operate or store them exposed direct to sunshine or high temperature/humidity

#### 12.5 Caution for operation

- It is an indispensable condition to drive LCD's within the specified voltage limit since the higher voltage then the limit cause the shorter LCD life.
- An electrochemical reaction due to direct current causes LCD's undesirable deterioration, so that the use of direct current drive should be avoided.
- Response time will be extremely delayed at lower temperature then the operating temperature range and on the other hand at higher temperature LCD's how dark color in them. However those phenomena do not mean malfunction or out of order with LCD's, which will come back in the specified operation temperature.
- If the display area is pushed hard during operation, some font will be abnormally displayed but it resumes normal condition after turning off once.
- Slight dew depositing on terminals is a cause for electro-chemical reaction resulting in terminal open circuit.

Usage under the maximum operating temperature, 50%Rh or less is required.

TEL: 86-755-23037763

Mobile: +86-139-2528-0716

Web: www.kingtechgroup.cn

#### 12.6 storing

In the case of storing for a long period of time for instance, for years for the purpose or replacement use, the following ways are recommended.

- Storage in a polyethylene bag with the opening sealed so as not to enter fresh air outside in it. And with no desiccant.
- Placing in a dark place where neither exposure to direct sunlight nor light's keeping the storage temperature range.
- Storing with no touch on polarizer surface by the anything else.
   [It is recommended to store them as they have been contained in the inner container at the time of delivery from us

#### 12.7 Safety

- It is recommendable to crash damaged or unnecessary LCD's into pieces and wash off liquid crystal by either of solvents such as acetone and ethanol, which should be burned up later.
- When any liquid leaked out of a damaged glass cell comes in contact with your hands, please wash it off well with soap and water

#### 13. Precaution for Use

#### 13.1

A limit sample should be provided by the both parties on an occasion when the both parties agreed its necessity. Judgment by a limit sample shall take effect after the limit sample has been established and confirmed by the both parties.

#### 13.2

On the following occasions, the handing of problem should be decided through discussion and agreement between responsible of the both parties.

- When a question is arisen in this specification
- When a new problem is arisen which is not specified in this specifications
- When an inspection specifications change or operating condition change in customer is reported to KINGTECHIFT, and some problem is arisen in this specification due to the change
- When a new problem is arisen at the customer's operating set for sample evaluation in the customer site.

### 14. Packing Method
